why EP Medica?

Family-run business, EP Medica has established itself in the medical sector thanks to continuous research and through building relationships with professionals in different sectors: pediatrics, pneumology, obstetrics, child neuropsychiatry, cytology, hospital staff.

Thanks to the network of professionals that revolve around the company, EP Medica guarantees the quality of its products, purchased daily by thousands of people.

EP Medica works in import export, but also with hospital and university companies, as well as pharmaceutical distributors.

when NASIR?

- Daily hygiene, in order to prevent obstructions due to stagnation of secretions.
- Prevent symptoms and assist in breathing difficulties due to diseases such as cold, sinusitis and rhino-chronic sinusitis, post-operative courses, adenoides, turbinate hypertrophy, nasal polyposis, otitis, cough, asthma, bronchitis and bronchiolitis, cystic fibrosis.
- Removal of allergens and environmental particles such as dust, smoke or fumes.
- Adjuvant in the treatment of nocturnal nasal obstruction and snoring.

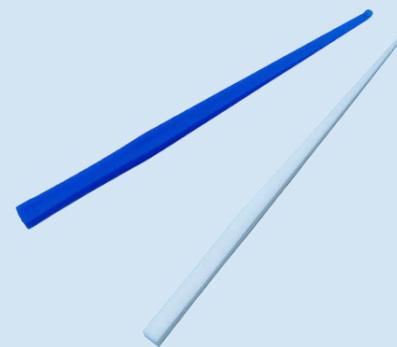

education | training

EP Medica operates in schools to educate on the correct prevention of respiratory diseases. Furthermore, courses are organized every year for midwives and healthcare personnel.

FOCUS ON!

Nasal Scraping

DEVICE FOR CYTOLOGICAL COLLECTION

Nasal Scraping is a sterile and disposable CE medical device, intended for qualified medical personnel, for a quick and painless nasal cytological sampling.

about us

E.P. medica srl has been working in the medical device industry since 2007, offering products mainly dedicated to the treatment and prevention of respiratory diseases, with the collaboration and support of top-level professionals in the fields of pediatrics, allergy, pulmonology, ENT (Ear, Nose and Throat) and experts in nasal cytology and cystic fibrosis in Italy. Demo videos, info, scientific publications, instructions and much more is available at epmedica.it.

Expertise

Competence, reliability and passion have always been our fundamental elements. Our expertise is at the service of our customers' health, first of all.

Quality

Our devices are continuously innovated, thanks to the help of our specialists and partners.

Safety

Our products are rigorously tested following current regulations, and designed to promote the convenience of our customers; for this purpose we provide multiple solutions for specific needs.

Nasir Neb

NASAL NEBULIZER

Nasir NEB is a device for the administration of topical solutions through intranasal nebulization, such as anti-inflammatory, analgesic, anaesthetic, antihistamine and anticonvulsant drugs, in hospital or home settings.

Nasir Baby Kit Nasir Baby

NASAL WASH FOR INFANT AND CHILD

Nasir Baby® is a sterile medical device for pediatric nasal rinse, in children from 6 to 36 months. It cleans the nose from the secretions and solves nasal obstruction, improving sleep quality. Nasir Baby® comes with a saline bag with injection ports to add medication to the solution. Thanks to its soft silicone pediatric nozzle, the irrigation is comfortable and quick; in fact the nozzle is designed to reduce excessive pressure from the syringe, allowing the continuous flow of the solution. With head turned sideways, the solution is injected into the nostril.

Nas-Air

NASAL DILATOR

Nas-Air® is a discreet and comfortable internal nasal dilator able to improve oxygenization, sleep quality, reducing snoring time. After mechanical dilation the nasal airflow can increase up to 25%; this change is comparable with that observed after decongestant use. It can also ease sleep apnea, and improve performance in most sport activities; moreover thanks to the improved oxygenization, focus can be boost up.

Otosblok

TUBAL GYMNASTICS DEVICE

It is indicated for the normalisation of pressure in the middle ear and in the treatment of tubal dysfunctions of children over four years of age and adults. It is also indicated to reduce ear barotrauma (from airplane flight, scuba diving, mountain climbing, etc.), promote hearing restoration, and maintain the efficiency of the Eustachian tube.

Nasir Rapid

RAPID NASAL IRRIGATION

Nasir Rapid® is a new medical device for quick and efficient nasal irrigation. Thanks to its new L-shaped nozzle designed to ease nasal irrigation and reduce excessive pressure from the syringe, Nasir Rapid® allows a nasal rinse with a safe and continuous flow of the solution. The nozzle can be connected to any Luer Lock syringe. For adults and children from age 3.

Isotonic Hypertonic

NASAL SHOWERS

The Nasir® system (Nasal Irrigation system) is made up of a 250/500ml sterile saline bag (hypertonic and isotonic solution) and a 60-cm flow device which guarantees a low liquid pressure of 0,058 atm, even more reducible thanks to a roller clamp. This prevents any possible damage to the nasal mucosa or to the middle ear through the Eustachian tube. With its irrigator tip placed at the nostril to dilate the valve, the solution is directed into all portions of the nasal cavity. This nasal lavage's system allows to irrigate all the nasal cavities, going through the nasopharynx
